

Nautica®

The Nautica® Series from Celestron features waterproof models for marine use. Choose from three feature-rich models - whether you want center focus, traditional individual focus, or a model with a compass and reticle. All are rubber covered to protect against rough handling. All provide maximum optical performance with BAK-4 prisms and multi-coatings for sharp images with high contrast and resolution. Each model has a large, 50mm objective lens to offer maximum image brightness even in low light conditions, like dusk and dawn.

FEATURES

Nautica®

7 x 50 CF Center Focus

- Smooth center focus wheel
- Easy-to-grip, large objective diopter ring for smooth and more precise focusing
- Attached objective caps, so they won't be lost at sea
- Completely waterproof - dry nitrogen charged and sealed with internal O-rings to prevent internal fogging - unaffected by climate and temperature changes
- Water resistant, Nylon carrying case
- Tripod adapter fitting for tripod mounting

Model 71187
7 x 50 CF

Model 71188
7 x 50 IF

Nautica®

7 x 50 IF/RC Reticle/Compass

- Backlit illuminated liquid dampened magnetic compass - excellent navigational tool for land or sea
- Horizontal and vertical etched reticle to help determine relative size of objects
- Rangefinding dial calculates actual object distance or size
- Completely waterproof - dry nitrogen charged and sealed with internal O-rings to prevent internal fogging - unaffected by climate and temperature changes
- Individual eyepiece focus with diopter scale for quick and accurate focusing
- Excellent depth of field for minimal focus adjustments
- Nautical style padded canvas case and straps
- Attached objective caps, so they won't be lost at sea
- Tripod adapter fitting for tripod mounting

Model 71189
7 x 50 IF/RC

Nautica®

7 x 50 IF Independent Focus

- Completely waterproof - dry nitrogen charged and sealed with internal O-rings to prevent internal fogging - unaffected by climate and temperature changes
- Individual eyepiece focus with diopter scale for quick and accurate focusing
- Excellent depth of field for minimal focus adjustments
- Nautical style padded canvas case and straps
- Attached objective caps, so they won't be lost at sea
- Tripod adapter fitting for tripod mounting

The Nautica Model 71189 features a rangefinder scale with backlit compass
